Real Time Cyber Safety and Soundness

The co-managed system that combines cybersecurity & cybercompliance to deliver real time Safety and Soundness for today's financial institutions.

Purpose-built for financial services

Regional and community-focused FIs face an average of 20 million potential cyber threats every single day. Adding to the challenge of being high value targets of relentless cyber crime, these FIs also have unique complexities in managing threat volume and sources, staffing and resource limits, budget constraints and regulatory pressures.

Operating in a hotbed of new and evolving cyber threats that target them specifically, as well as regulations that are expanding at both federal and state levels, means financial institutions can't afford 'one-size-fits-all-industries' cybersecurity & compliance solutions.

That's why DefenseStorm has created the only real time cybersecurity & cybercompliance system designed expressly for the unique cyber threat and compliance demands facing today's banking organizations.

"We couldn't find another solution in the market that did what DefenseStorm did, in terms of bringing together IT governance and incident management workflow into a single system."

Troy Wunderlich,
VP, Director of Risk Management
Washington Trust Bank

The DefenseStorm GRID

The state-of-the-art DefenseStorm GRID powers the only purpose-built for banking system that integrates essential threat detection and compliance processes to deliver automatic regulatory adherence, machine learning assisted intelligence and real time 360° threat visibility and prioritization with speed, accuracy and reporting at a click.

DefenseStorm TRAC Team
(Threat Ready Active Compliance)

Expert co-management: Our TRAC Team experts work with you to deliver a threat ready active compliance advantage almost immediately.

Smarter, safer, & real time ready to report: Your financial institution will be threat-ready, team-smart and board-accountable in a matter of weeks.

Always-on Intelligent Compliance: Automatic monitoring, updating and reporting

Real time Active Compliance Engine

Our real time Active Compliance engine works together with our cybersecurity technology and processes to drive perpetual, full cycle compliance.

- Evidence collection
- Proof of compliance anytime
- Real time board visibility
- Google search-like ease of query
- Push-button reporting on demand
- FFIEC CAT built-in

Conceived by bankers and fintech experts, DefenseStorm unifies cyber threat detection, investigation and reporting–both ground and cloud logs–with compliance into a single place in real time.

Event data is aggregated across all cybersecurity tools, and links policies to real time alerts, so that financial institutions can prove to regulators they are both secure and compliant with evolving FFIEC cybersecurity requirements as well as with other regulations and their own policies.

Threat Ready

Manage your total cyber exposure proactively.

- Consolidate security data from any and all sources, without volume limits
- Gain real time visibility into the security posture of your whole FI
- Eliminate false positives and prioritize events so you can zero-in on threats that matter most
- Detect associated alerts that might be missed
- Connect monitoring, detection, triage, response, resolution, audit trails and reporting
- Machine learning assisted technology continuously improves effectiveness

Team Smart

Multiply your cyber team & talent almost instantly.

Our Team
- The DefenseStorm team of banking and cybersecurity experts work for you
- Machine learning-assisted cyber monitoring and management, 24x7x365
- Security Operations Center in the cloud, without the capex and staff-up

Your Team
- Access and work with the same tools and data that DefenseStorm sees and uses
- Maintain complete visibility and control over your security posture
- Customize your rules of engagement for alerts, triage and response

Board Accountable

Prove compliance to policy and regulation continuously.

- Connect policy with real time enforcement of cyber controls
- Receive built-in FFIEC CAT capabilities, policy definitions, control points and reports
- Cut audit prep and inquiry response time by half or more
- Answer audit requests with Google search-like speed and simplicity
- Enhance separation of duties with an objective partner to further strengthen compliance
